My Goal/Purpose/Mission in life

As I'm approaching twenty-seven in the coming months, my purpose in life is to be a provider to my family, create, innovate and develop my mind by learning to create an application or software or landing a role with a company to stabilize my career. I want to be able to bring joy and happiness to others and give back to those in need, especially for my family and friends.

I want to be successful and becoming that is never easy. I'm on a mission to sacrifice my energy and time, so that my family could live happily without the stressing of not having enough to pay the bills and being able to laugh, love life and appreciate everything we have and know that I did my all to make that possible.
